

Mr. Girish Krishnamurthy

Mr. Girish Krishnamurthy, best known for being a transformational leader is CEO and Managing Director of Tata Medical and Diagnostics Ltd. (Tata MD). He is the director at Tata Indian Institute of Skills and Tata 1 MG. Girish has over 3 decades of vast and rich blend of entrepreneurial and enterprise leadership experience in technology, Healthcare, Education, and Skills. Before moving to India in 2004, he worked across geographies, as a technologist and entrepreneur, successfully launching several products and businesses

Among other healthcare disruptions, Girish is the chief architect of a patented, innovative healthcare transformative model - the Digital Nerve Centre. He envisioned and delivered high impact healthcare services from primary to tertiary care including specialties like Oncology through this model. He has used this replicable and scalable model to drive change to improve lives of the common man and to transform India.

This innovative model is managing healthcare services for over 1.6 million citizens in rural Karnataka. Transformation lead by Girish at the All-India Institute Medical Science (AIIMS) - the world's largest OPD, was lauded by the Honorable Prime Minister of India, as the most successful 'Digital India Initiative' of 2016.

Girish has played a key role Tata Group's initiative of establishing the Indian Institute of Skills (IIS), for the Govt. of India. He has built a unique skilling model that has SCALE & SPEED to deliver a 'Demographic Dividend' for economic growth.

Girish holds a MBA from the University of Texas, Dallas and a graduate in Electrical Engineering and in Mathematics from the University of Madras. Over the years, Girish has been recognized for his out-of-the-box thinking and has been felicitated with several awards. He has also authored papers on technology and business strategies. A passionate speaker at various industry forums, Girish also mentors several start-up businesses.
